

# **Vote NO *again* to HIGHER TAXES FOR 26 YEARS**

**The Trustees CAN finance and build  
economical new fire stations right away  
— without raising taxes.<sup>1</sup>**

The Trustees' \$8 million tax levy is unnecessary and lasts for 26 years. Contrary to Trustees' claim, it only pays for one enormous \$8.8 million station, leaving the needier Station 2 to wait years before being built.<sup>2</sup> During this economic crisis, households can't afford a total of \$1600.

**Last year, 65% said NO to new taxes.  
Not much has changed.  
The stations are still the same  
excessive size and cost.**

The proposed stations are 4x larger than the existing stations. The cost per square foot is \$100-\$200 more expensive than recently built stations in similar Ohio townships.

**Voting No ensures ECONOMICAL new fire stations.**
